**Lotus**

# 190-983

*IBM Lotus Notes Domino 8.5 Managing Servers and Users*

**Question: 151**

What can an administrator do with the results of DDM probes?

- A. Analyze the results and perform possible corrective actions in the Domi Domain.
- B. Run the "Fix Issues Agent" to correct all DDM issues.
- C. Add them to the Monitoring Configuration database.
- D. Ignore them as they are only suggestions.

**Answer: A**

**Question: 152**

Which document would Sara use to enable calendar ghosting for all users on a Domo mail server?

- A. Mail settings
- B. Server document
- C. Desktop settings
- D. Configuration document

**Answer: A**

**Question: 153**

Don is trying to install a multi-user installation for his Domi Designer and Administrator client machine, but he can't find the option to select. Why is Don not able to find the option?

- A. The feature must be set in the install.xml file.
- B. The option is available only in a silent installation.
- C. The feature is not available for Windows operating systems.
- D. The feature is available only for the test client-only installation package.

**Answer: D**

**Question: 154**

Don wants to configure a single-user installation of the test client on his Linux operating system but finds it installs a multi-user installation. Why is this occurring?

- A. A multi-user installation is the only installation configuration for the Linux operating system.
- B. The Domi administrator has created a transform file to install only multi-user configurations.
- C. Don is using the incorrect command line for installing the client, or he should be using a transform file to install a single-user installation.
- D. The test client can't be configured as a single-user installation; it has to be installed as a multi-user installation for all operating systems.

**Answer: A**

**Question: 155**

The test 8.5 installation package for Linux is available in which of the following formats?

- A. RPM or DEB install kits
- B. RPM, ISMP, ZIP, or DEB install kits
- C. RPM, ISMP, or DEB install kits
- D. Installation files for the test clients are available only in a self-extracting ZIP file.
- E. There is no 8.5 installation package for Linux; only the Domi server is supported for Linux.

**Answer: A**

**Question: 156**

Dawn uninstalled and then reinstalled her WebSphere Portal composite application support for portlets from her WebSphere Portal server. What must she do to her existing composite applications?

- A. Restart the WebSphere Portal Server.
- B. Restart the HTTP task on the Portal Server to refresh the portlets.
- C. Dawn must re-compile her applications from a command line on the WebSphere Portal Server.
- D. Dawn must recreate the composite application elements that contain portlets using the newly installed portlets.

**Answer: D**

**Question: 157**

Peter wants to deploy DAOS in his environment where that his company has migrated to Domino 8.5. If DAOS is not enabled, does Peter need to enable transaction logging on his Domino server as well?

- A. - Transaction logging is not required for DAOS.
- B. Yes - Transaction logging must be enabled and is a requirement of DAOS.
- C. Yes - but Transactional Logging is enabled by default when he enabled DAOS.
- D. - Transaction logging can cause performance issues and corruption when used with DAOS.

**Answer: B**

**Question: 158**

Karl has a mixed environment of Domino 7 and Domino 8.5 servers and would like to enable the out-of-office server service. Would Karl be able to enable this feature?

- A. Yes, the service can be enabled as long as the primary mail gateway server is Domino Version 8.5.
- B. Yes, if the user's mailfile server is version 7 and it is clustered with a Domino server running version 8.5.
- C. , all servers in his environment must be Domino Version 8.5. He can use the service setting when all servers have been upgraded to Lotus Domino 8.5.
- D. Yes, this functionality is available in both Domino version 7 and version 8.5 with the Domino Directory using a version 8.5 Domino Directory template.

**Answer: C**
