Adobe LiveCycle ES2 Form Developer ACE

QUESTION: 105

You create an XDP template that uses several fragments. You save the form as a dynamic PDF form and deploy it as a standalone PDF form on your server. What will happen when you open the form in Adobe Reader?

- A. The form will open, but the sections of the form referencing the fragments will be missing
- B. The form will open, and all sections of the form will display correctly
- C. The form will not open, unless it is rendered using LiveCycle
- D. The form will not open, and a warning message will appear that certain sections of the form cannot be displayed

Answer: B

QUESTION: 106

Which two LiveCycle modules can render an XDP template that has been designed with fragments as a PDF? (Choose two.)

- A. LiveCycle Output
- B. LiveCycle Data Services
- C. LiveCycle Forms
- D. LiveCycle Reader Extensions
- E. LiveCycle PDF Generator

Answer: A, C

QUESTION: 107

You want to create a form that will be filled out by a user and then emailed to LiveCycle to initiate a process. What should you do?

- A. Add a submit button to the form and have it submit to an email endpoint
- B. Add a submit button to the form and have it submit to a remoting endpoint
- C. Add the Form Bridge object
- D. Add a regular button to the form and have it call a SOAP endpoint

Answer: A

QUESTION: 108
