IBM

A2010-590

IBM Tivoli Storage Manager V6.3 Implementation

- A. The amount of space that is used in the storage pool reaches the low migration limit.
- B. The amount of space that is used in the storage pool reaches the high migration limit.
- C. The amount of space that is used in the storage pool reaches the low migration threshold.
- D. The amount of space that is used in the storage pool reaches the high migration threshold

Answer: D

QUESTION: 131

An administrator of an IBM Tivoli Storage Manager V6.3 (TSM) Server acknowledges the daily maintenance task takes too long and harms the client backup during the evening. What is a good way to improve the performance of daily maintenance tasks?

- A. add memory to the TSM Server
- B. use parallel and serial statements in administrative schedules
- C. schedule the maintenance script to run only every second day
- D. shorten the backup window to get the maintenance tasks finished

Answer: B

QUESTION: 132

The IBM Tivoli Storage Manager client has been doing incremental backups for several years. Some of the directories must be restored to the latest date. What is the correct NoQueryRestore process to use?

- A. `dsmc restore C:\to-be-restore-dir* -subdir=yes c:\restored-directoryV`
- B. `dsmc restore C:\to-be-restore-dirV* -pick -subdir=yes c:\restored-directoryV`
- C. `dsmc restore C:\to-be-restore-dir* -inactive -subdir=yes c:\restored-directory\`
- D. `dsmc restore C:\to-be-restore-dirX* -pick -inactive -latest -subdir=yes`
- E. `c:\restored-directoryX`

Answer: A

QUESTION: 133

A company has many network attached storage systems of different types and vendors. What must be kept in mind when the backup solution will use the function SnapMirrortoTape?

- A. It is not valid for NetApp vFiler
- B. It is supported for Celerra/VNX systems.
- C. It is only available for NetApp and N-Series systems.
- D. It can be combined with a normal network data management protocol backup.

Answer: C

QUESTION: 134

Which three communication protocols are valid for IBM Tivoli Storage Manager (TSM) clients to communicate with the TSM Server? (Choose three.)

- A. TCP/IP
- B. named pipes
- C. shared pages
- D. unnamed pipes
- E. shared memory
- F. dedicated memory

Answer: A, B, E

QUESTION: 135

An administrator successfully configured an IBM Tivoli Monitoring for IBM Tivoli Storage Manager V6.3 (TSM) environment. What must be done to manage the retention data stored in the monitoring database?

- A. edit the retention parameter in dsmserv.opt
- B. edit the Agent Instance Configuration for the TSM Servers
- C. log into the IBM Tivoli Enterprise Portal and edit the history configuration
- D. define a management class in the TSM Server to manage the retention of the monitoring client

Answer: C

QUESTION: 136

Which command defines a schedule to backup incremental Windows server drives c: and d: on the last Sunday of the month?

- A. define schedule standard monthly_backup option="c:* d:*" dayofweek=Sunday weekofmonth=last
- B. define schedule standard monthly_backup objects="c:* d:*" dayofweek=Sunday weekofmonth=last
- C. define schedule standard monthly_backup option="c:* d:*" dayofweek=sunday weekofmonth=last schedst=enh
- D. define schedule standard monthly_backup objects="c:* d:*" dayofweek=sunday weekofmonth=last schedst=enh

Answer: D

QUESTION: 137

Which device type(s) allow concurrent multiple read/write accesses to the same storage pool volumes?

- A. file only
- B. disk only
- C. tape only
- D. file and disk

Answer: B

QUESTION: 138

Where is the upgrade utility installed that is used to upgrade from IBM Tivoli Storage Manager V5.5 to V6.x?

- A. on the system that has the new server and its database
- B. on the system that has the original server and its database
- C. on the system that is the target for the new server and database
- D. on a proxy server in the same network as the original server and database

Answer: B

QUESTION: 139
