SpringSource

## CoreSpringV3.2

*Core-Spring (based on Spring 3.2)*

**QUESTION: 90**

Consider the following Spring Security configuration

```
<security:http>
  <security:intercept-url pattern="/accounts/*" access="ROLE_USER" />
  <security:intercept-url pattern="/accounts/editAccount.htm"
access="ROLE_ADMIN" />
</security:http>
```

In order to access to "/accounts/editAccount.htm", what role is required? (select one)

- A. ROLE\_USER
- B. ROLE\_ADMIN
- C. Both ROLE\_USER and ROLE\_ADMIN
- D. No role is required

**Answer: A**

**QUESTION: 91**

Select which of the following is a mechanism which can be used with Spring Security to store user details (select one)

- A. Database
- B. LDAP
- C. Properties file
- D. All of the above

**Answer: D**

**QUESTION: 92**

What is the principal purpose of Spring's Security XML namespace? (Select one)

- A. To provide a mechanism for applying security to Spring Web Services
- B. To provide a schema for configuring Spring Security in a Spring XML configuration file
- C. To provide a mechanism for encrypting Spring Security XML configuration files
- D. To allow Spring Security to be applied to XHTML

**Answer: B**

**QUESTION: 93**

What is the principal purpose of Spring's Security tag library? (Select one)

- A. To provide a mechanism for applying security to Spring Web Services
- B. To allow certain URLs to be tagged as requiring secure access
- C. To provide functionality in JSP pages, such as hiding certain sections based on roles
- D. To allow Spring Security to be applied to XHTML

**Answer: C**

**QUESTION: 94**

Which of the following statements is true concerning configuring JMS Resources with Spring? (Select one)

- A. Spring cannot use a standalone JMS provider
- B. Spring can use the JMS resources provided by an application server
- C. The Connection Factory cannot be standalone
- D. The Connection Factory cannot be retrieved from JNDI

**Answer: B**

**QUESTION: 95**

Which of the following statement is true concerning Spring's JmsTemplate (select one)

- A. The JmsTemplate manages resources transparently (e.g. Connections, default Queue...)
- B. The JmsTemplate converts checked JMSEExceptions to runtime equivalents
- C. The JmsTemplate provides convenience methods and callbacks

D. All of the above

**Answer:** D

**QUESTION:** 96

Which of the following methods is NOT provided by the JmsTemplate? (select one)

- A. setDefaultDestination
- B. onMessage (asynchronous call)
- C. convertAndSend
- D. receiveAndConvert (synchronous call)

**Answer:** B

**QUESTION:** 97

Consider the following Spring JMS configuration

```
<jms:listener-container connection-factory="connectionFactory">  
<jms:listener destination="order.queue" ref="orderListener" method="order"/>  
</jms:listener-container>
```

Which of the following statements is true? (select one)

- A. Spring will automatically receive messages from the order.queue.destination
- B. The orderListener bean has to implement javax.jms.MessageListener or Spring's SessionAwareMessageListener interface
- C. The application needs to run in an application server that provides a JMS implementation out of the box
- D. Spring will automatically send a response message

**Answer:** A
