HP

HP0-W03

Advanced SAN Architecture

- A. single FCIP converter
- B. single multiprotocol router
- C. point-to-point longwave inter-switch link
- D. point-to-point shortwave inter-switch link

Answer: C

QUESTION: 66

Which statement about the File System Extender (FSE) capabilities is correct?

- A. FSE does not allow file expiration.
- B. FSE supports file system conversion to WORM.
- C. FSE has no built-in backup and restore functionality.
- D. FSE provides a hierarchical tiered storage migration layer.

Answer: B

QUESTION: 67

What is outside the scope of iSCSI technology?

- A. use as a SAN extension protocol
- B. access to storage through a NIC
- C. SAN without fibre channel technology
- D. block level access to storage devices

Answer: A

QUESTION: 68

Which statement about B-series (Brocade) and M-series (McDATA) fabric switches is correct?

- A. B-series and M-series fabric switches require a license to increase the buffer-to-buffer credits.
- B. M-series fabric switches require a license to increase the buffer-to-buffer credits

while B-series do not.

C. B-series fabric switches require a license to increase the buffer-to-buffer credits while M-series do not.

D. B-series and M-series fabric switches do not require a license to increase the buffer-to-buffer credits.

Answer: C

QUESTION: 69

What are two HP multivendor environment services? (Select two.)

- A. Critical Service for SANs
- B. Managed Multivendor Solution
- C. Managed Multivendor Environment
- D. Proactive 24-hour Service for SANs
- E. Operational Multivendor Support Service

Answer: A, D

QUESTION: 70

What effect does multi-mode enabled have on an HP StorageWorks 2122-2 IP Storage Router?

- A. concurrent FCIP and iSCSI routing
- B. routing between VSANs and LSANs
- C. disabled single-mode fibre channel links
- D. load-balancing across the FCIP networks

Answer: A

QUESTION: 71

What are characteristics of B-Series Fabric Manager? (Select three.)

- A. in-band management

- B. out-of-band management
- C. separate software package
- D. multiple B-Series switch management
- E. embedded in the Brocade switch firmware
- F. management platform for M-Series and B-Series switches

Answer: B, C, D

QUESTION: 72

What is the effect of the HP Cluster Extension?

- A. support for greater distances between cluster nodes
- B. usability of the fiber channel interconnect for the heartbeat
- C. cluster awareness for HP StorageWorks Continuous Access (CA)
- D. cluster management integration in Replication Solutions Manager (RSM)

Answer: C

QUESTION: 73

Which FCIP device supports HP B-Series and M-Series, but not C-Series fibre channel switches for heterogeneous SAN extension?

- A. SAN Valley SL1000 IP-SAN Gateway
- B. HP StorageWorks Multiprotocol Router
- C. HP StorageWorks SR2122-2 IP Storage Router
- D. Cisco MDS 14/2-Port Multiprotocol Services Module

Answer: A

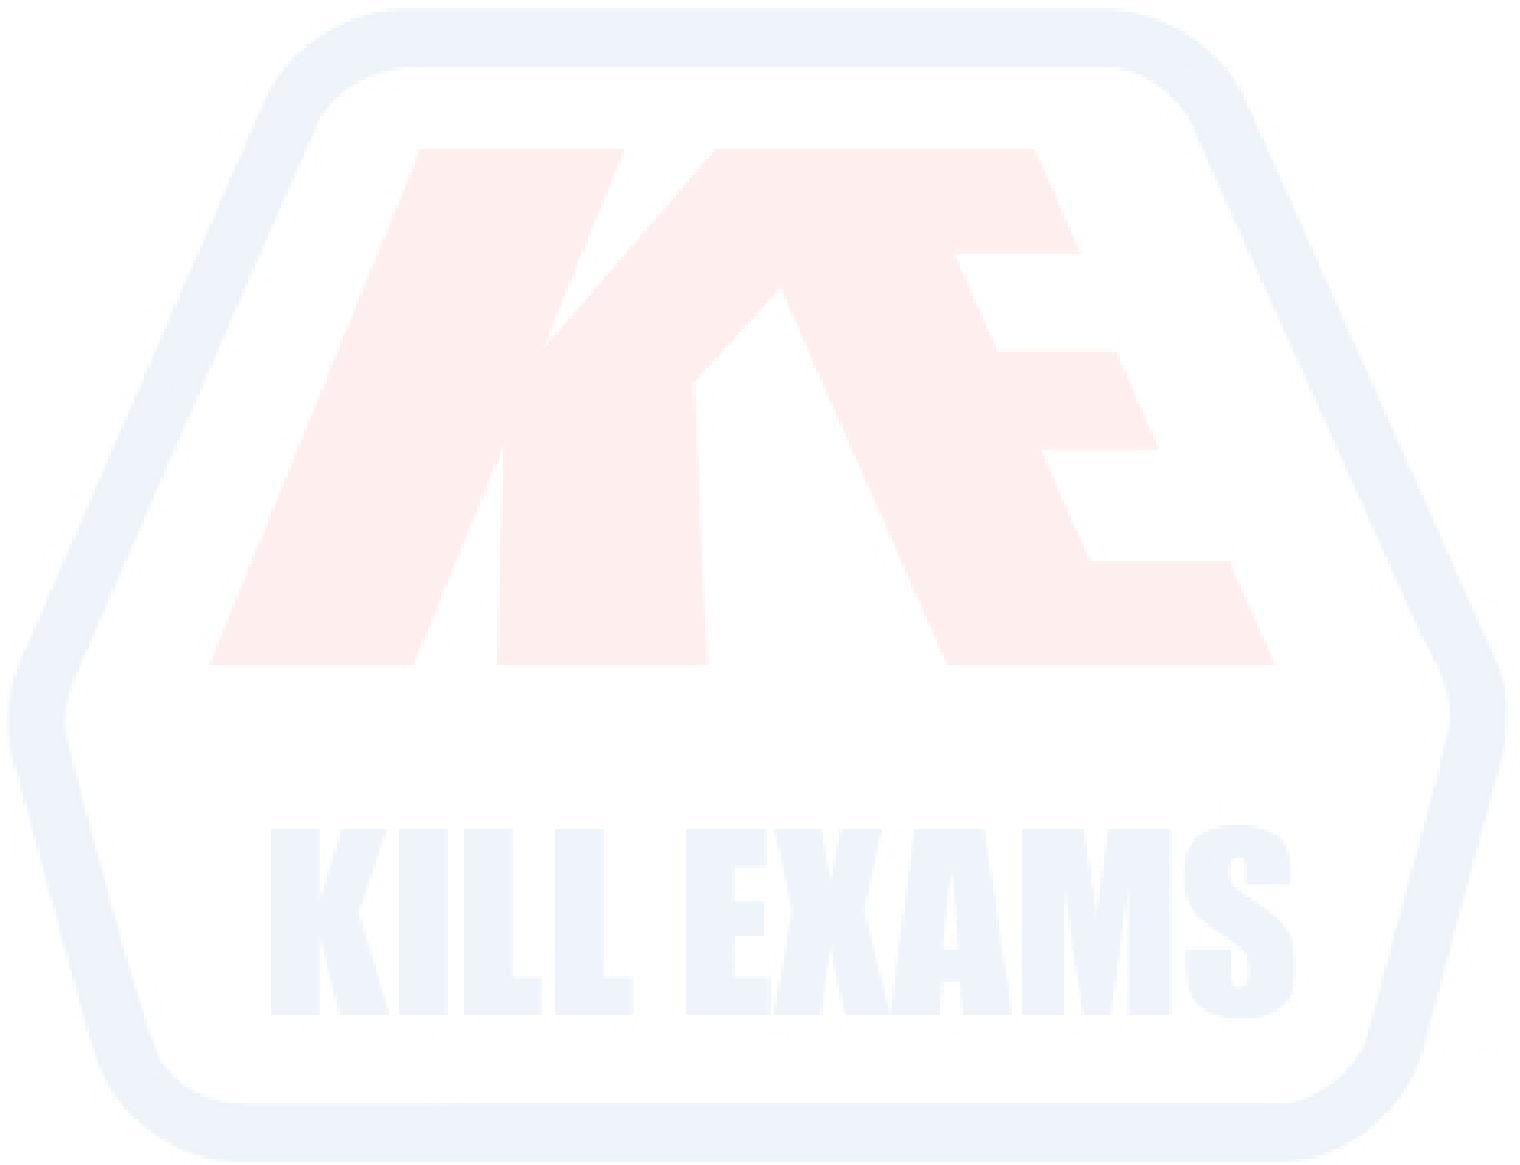

QUESTION: 74

Which PID formats use the same PIDs for a port?

- A. native and core
- B. VC encoded and native

- C. core and extended edge
- D. native and extended edge

Answer: D
