QUESTION: 29

Which is NOT a value proposition of Cloudants fully managed, database-as-a-service (DBaaS) solution?

- A. Scales massively to handle millions of daily active users.
- B. Guaranteed performance and up-time, removing the risk of project & SLA delivery failure.
- C. Complete access control and security over your data with dedicated, on-prem database deployment.
- D. More agile development for Web and mobile platforms thanks to Cloudants flexible database schema.
- E. Developers need only focus on development of better applications and code, and not database administration.

Answer: D

QUESTION: 30

Which statement regarding the Multi-tenant cluster pricing tier is the most correct?

- A. Data volume is measured in GBs per month: users are charged at the end of every monthly billing cycle according to the amount of data volume processed and the number of API requests made, no matter the usage amount.
- B. Data volume is measured in GBs per month: users accrue charges according to the number of API calls made, but if this monthly total is under \$5.00 USD the user will not be charged.
- C. Data volume is measured in GBs per month: users pay a flat rate of \$500 USD per month for access to the multi-tenant tier and can perform an unlimited number of API calls.

Answer: A

QUESTION: 31

Which statement about Cloudant's support features is TRUE?

- A. No multi-master replication.
- B. No geo-load balancing.
- C. No difficulty adding new regions.
- D. Poor data throttling.

Answer: D
