TIBCO Rendezvous 7 Certification

QUESTION: 102

TIBCO Rendezvous has been installed on two computers on the network. Which two TIBCO Rendezvous tools are already available to check connectivity between the two machines? (Choose two.)

- A. tibrvlisten/tibrvsend
- B. rvperf
- C. rvtest
- D. rvcache
- E. iniftst

Answer: A,B

QUESTION: 103

Which three statements are true about service group usage? (Choose three.)

- A. Inbound broadcast messages on the transport service can arrive from any network, regardless of the transport network parameter.
- B. Once a network binds a service defined by service parameter, outbound broadcast messages can only travel within the network defined by the transport's network parameter.
- C. Point-to-point messages on the transport service travel on the appropriate network (as determined by the operating system) regardless of the transport network parameter.
- D. The program A, on the computer named TAHOE, has a transport that communicates on the service 7400 over the network NET1. It is legal for any program to subsequently create a transport (connecting to the same daemon process on TAHOE) to communicate on 7400 over any other network, such as NET2.

Answer: A,B,C

QUESTION: 104

What are two methods of entering the routing configuration of a TIBCO Rendezvous routing daemon (rvrd)? (Choose two.)

- A. paste an XML configuration through the HTTP interface
- B. edit the store file using a text editor
- C. use command line arguments
- D. use the HTTP interface

Answer: A,D

QUESTION: 105

TIBCO Rendezvous Batch Mode is used when the program needs to send _____.

- A. large messages, with several of fields on each
- B. small/large messages with OPAQUE fields
- C. many very small messages
- D. large messages, with a single (or very few) huge field

Answer: C

QUESTION: 106

Which three statements are true about Direct Communication? (Choose three.)

- A. If a transport object on host computer foo binds a service for Direct Communication, no other transport object on foo can bind that service for regular communication.
- B. Any number of transport objects on host computer foo, in any number of processes, can specify the same service for Direct Communication.
- C. The two parts of any service parameter may specify two different port numbers.
- D. On host computer foo, no two transport objects (whether in the same process or different processes) can bind the same service for Direct Communication.

Answer: A,C,D

QUESTION: 107

Which two methods suppress Daemon Auto-Start? (Choose two.)

- A. specify the network parameter with localhost parameter as if it were a remote daemon; use either the local computer's loopback address, 127.0.0.1, or the local host name
- B. specify the local daemon with a two-part parameter as if it were a remote daemon; for the first part supply either the local computer's loopback address, 127.0.0.1, or the local host name
- C. specify the local daemon with a two-part parameter; use -no-auto for the first part
- D. remove/rename RVD from all the directories included in path environment variable

Answer: B,D

QUESTION: 108

The INBOX generated in a TIBCO Rendezvous request application is included _____.

- A. in the message not visible to any subscribing applications and the replying application sends the reply with a simplesend() call to the request application
- B. at the packet level, and the replying application extracts the reply subject and uses it as the subject of the return message
- C. in the data payload of the message and the replying application sends the reply with a simplesend() call to the request application
- D. as the reply subject in the message and the replying application extracts the reply subject and uses it as the subject of the return message

Answer: D

QUESTION: 109

A message structure is to contain 127 different fields. Performance is a key point so that processing the fields must be done as quickly as possible. Which is the preferred method to accomplish this?

- A. using Field Identifiers
- B. using Field Names numbered from "1" to "127"
- C. using Field Names with the shortest length possible
- D. using Field Names

Answer: A

QUESTION: 110

Which three statements are true about TIBCO Rendezvous Virtual Circuits? (Choose three.)

- A. All inbound messages come only from the opposite terminal.
- B. TIBCO Rendezvous Direct Communication may be used for Virtual Circuits.
- C. The VC.READY Advisory Message is presented on all terminals when the communication is established.
- D. Terminals receive explicit feedback if the connection is interrupted. Programs will need to re-establish the connection by themselves.
- E. Terminals receive explicit feedback if the connection is interrupted. Underlying libraries will try to reconnect with the opposites again.

Answer: A,B,D
